

My personal description

I'm a big, athletic boy. My hair is blonde and my eyes are blue-gray. I am polite, helpful, wide, reliable, sometimes very quiet and sometimes funny. In my spare time I like to play piano, compose music, play in the school band, manage Technikgroup at our school and am also interested in programming on the computer. In a programming contest in Berlin, I was able to implement with my team, its own idea of the real estate market. We won the first prize and presented our project to the newspaper Focus, Spiegel and the television station ZDF. This made me very proud. In addition, I like to meet with my friends. I like doing sports and I am happy doing with my father on my model railroad.
